7. Performed testing of software to identify, reproduce error,

SUMMARY

Starting in 2021 I began with a career as a Quality Assurance Tester and have improved and gained myself into a Quality Assurance Engineer. 3 years of experience in ensuring the quality and reliability of software applications. Conducted extensive functional, regression, and performance testing. Developed and maintained test scripts for automation frameworks. Contributed to the improvement of QA processes and best practices.

My expertise lies in both manual and automated testing, and proved by the various projects I included in. I also a highly motivated, leading by example, taking charge of a situation and coming up with excellent solutions. On every projects, my goal is to identify and resolve potential issues before they affect the end-user, ensuring a seamless and positive user experience.
